English Names for Korean Native Plants

머리말

우리는 누구나 좋은 이름을 갖기를 원하고, 또 불리기를 원합니다. 아이가 태어나면 제일 먼저 뜻과 소리를 염두에 두고 이름을 짓습니다. 또한 나쁜 이름은 법적인 절차를 거쳐 바꾸기도 합니다. 이름이 가지는 힘을 믿기 때문일 것입니다. 이름을 불리춤으로서 의미있는 존재가 된다는 시인의 시구처럼, 이름은 단순히 정보를 제공하는데 그치지 않고, 그 이름을 가진 존재의 의미와 가치를 결정짓게 됩니다. 식물의 이름도 마찬가지입니다. 단순히 식물이 가지고 있는 특징을 나타내는 것을 넘어서, 그 식물의 생태적 가치, 자라는 지역의 역사적 의미와 민족의 문화를 모두 내포하고 있습니다. 이것이 산림청과 국립수목원이 광복 70주년을 맞이하여 ‘우리 소나무의 진정한 광복’을 준비하게 된 까닭입니다.

2014년 10월 『나고야 의정서(Nagoya Protocol)』가 발표되면서, 식물의 원산지 주권은 한층 강화되었습니다. 이런 상황에서 우리나라의 식물주권은 그 어느 때보다 중요해졌으며, 다양한 방법을 통해 우리 식물 주권을 확보할 필요가 있게 되었습니다.

우리 식물의 이름은 한반도의 아픈 역사를 그대로 반영하고 있습니다. 한반도의 식물이 일본이나 중국에 비해 100년 이상 늦게 알려진 것도 있지만, 일제 강점기를 통해 많은 식물들이 일본인 학자들에 의해 연구되고, 학계에 보고되면서, 뜻하지 않게 일본식 이름을 그대로 가져가게 되었습니다. 뒤늦게 이런 이름들을 고쳐보고자 하나, 학명이 가진 특수성 때문에 변경이 쉽지 않습니다. 그러나 누구나 흔히 부를 수 있는 이름, 즉, 일반명은 그렇지 않습니다.

이에, 국립수목원에서는 한반도를 대표하는 식물을 ‘코리아(Korea)의 식물’로 세계에 적극적으로 알릴 필요가 있다고 여겨, 한국식물분류학회

전문가들과 함께 『국가표준식물목록』 작성 사업에 이어, 우리 식물에 영어 이름을 지어주는 작업을 시작하게 되었습니다. 자생식물 4,173종의 영어이름을 검토하여, 2,500종에 대해 새롭게 이름을 붙이고, 특산식물은 한국이 원산지임을 알 수 있도록 하였습니다. 또한 우리 문화와 밀접한 관계가 있는 식물과 특산 속에 대해서는 한글이름이 그대로 영어이름이 되도록 하였습니다.

『한반도 자생식물 영어이름 목록집』 발간으로, 그 동안 일본 또는 다른 나라의 식물로만 인식되었던 우리 식물들의 제대로 된 이름을 찾아주고, 이름이 없었던 식물들은 새로운 영어이름을 가지게 됨으로서, 국제사회에 우리 식물임을 소개하는 계기가 될 것입니다. 이 이름들이 확산되기 위해서는 모두 합심하여, 학술논문, 자료집, 표찰, SNS 등을 통해 많이 사용해 주는 것이 필요하며, 이를 통해 우리 식물은 합당한 이름을 가지게 되고, 우리가 진정한 이름의 주인이 될 수 있을 것입니다.

본 목록집이 나오기 까지 애써주신 국가수목유전자원목록심의회와 한국 식물분류학회 전문가분들에게 감사드리고, 국립수목원 관계자들의 노고를 치하하는 바입니다.

아무쪼록 본 목록집이 우리 식물의 주권 확보에 기여할 수 있기를 바라며, 국립수목원은 앞으로도 우리 자생식물에 대한 지속적인 연구와 지원을 아끼지 않을 것을 약속드립니다.

FOREWORD

We all want to have a good name, and to be called by a good name. When a baby is born, the first thing we do is, give a name to the baby considering the meaning and the sound. This is because we believe in the power of the name. As a phrase of a poem of a poet, call out the name, we become a meaningful existence. The name does not only provide simple meaning, but also determine the significance and the value of the existing being with the name. It is likewise with the plant's name. Plant's name shows not only the characteristics of the plant, but also the ecological value, and contains the historical meaning and the national culture of their habitat. This is why and National Arboretum have prepared 'True Independence of our pine' commemorating the Independence Day 70th Anniversary.

At the announcement of the 『Nagoya protocol』 in Oct. 2014, the sovereignty of the plants was strengthened. In this circumstance, our plants' sovereignty became more important than ever, and we realized the necessity to secure our plants' sovereignty through various methods. The names of our plants reflect the painful history of Korean peninsula. The plants of Korean peninsula were known more than 100 years later than those of Japanese and Chinese, but through the Japanese Colonial Period, plants were researched and reported by Japanese scientists, unintendedly, the names were given in Japanese style. We have tried to modify the names, but it is not easy because of the peculiarity of the scientific names. But the names we call out, the common names, they are different.

Hence, Korea National Arboretum have recognized that, it is needed to inform actively Korean peninsula typical plants as 'The plants of Korea' to the world, we have started to give English names to our plants, following to the 『Korean Plant Names Index』 preparation business with the experts of The Korean Society of

Plant Taxonomists. We have reviewed 4,173 species of native plants, and gave new names to 2,500 species, indigenous plants' names showing that the plants origin is Korea. Moreover the names of the indigenous plants and indigenous species that are closely related to our culture, we have decided to give English names literally same as the Korean names.

The publication of 『English Names for Korean native plants』, will be the opportunity to introduce these plants as our plants globally, giving proper names to our plants those were perceived as Japanese or other countries' plants, and giving names to those, which did not have any names at all. To widespread these names, we will have to work together in using these names, in treatise, materials, labels, SNS. Through these activities, our plants will have the reasonable names, and we will be the real host of the names.

Thank you to the experts of 'Korea National Plant List Committee' and 'The Korean Society of Plant Taxonomists' who have made efforts for this book to be published, and I also want to appreciate to the persons concerned of Korea National Arboretum.

I hope this book will contribute in securing the sovereignty of our plants, and the Korea National Arboretum will provide continuous research and support on our native plants in the future.

일러두기

우리 민족과 함께해 온 소나무의 영어이름으로 재패니즈 레드 파인(Japanese red pine)이 사용되고 있습니다. '줄기가 붉은 일본의 소나무'라는 뜻입니다. 세계적으로 한반도가 소나무 분포의 중심이지만 일본의 소나무가 서양인들에게 먼저 알려진 탓입니다. 이제 소나무가 한반도 중심의 나무임을 알려야 합니다.

우리 식물이 다른 나라의 식물로 알려진 경우 외에도 영어이름이 없는 식물도 있습니다. 식물주권의 확보는 한반도를 대표하는 식물을 '코리아(Korea) 식물'로 부르도록 세계에 알리는 일에서 출발합니다.

산림청 국립수목원은 우리 식물의 정체성을 확립하고 그 가치를 세계에 알리기 위해 아래와 같이 한반도 자생식물의 영어이름을 새롭게 정리했습니다.

- 한반도가 식물분포의 중심지이나 다른 국가명이 들어간 식물
- 우리 문화생활과 밀접한 관계가 있는 식물
- 한반도에만 살고 있는 특산식물
- 세계적으로 넓게 분포함에도 불구하고 특정 국가명이 들어간 식물

- ❶ 우리나라에 자생하는 관속식물 4,173 종류를 대상으로 하였으며, 목록의 배열은 국명의 한글 및 학명의 알파벳 순으로 각각 표기하였다.
- ❷ 분류군에 대한 학명과 국명은 국가표준식물목록(KPNI, The Korean Plant Names Index)을 기준으로 하였으며, 일부 분류군의 계급의 변화나 이명 처리 등에 대해서는 Tropicos, The Plant List 와 기타 문헌을 이용하여 보완 및 수정하였다.
- ❸ 국명의 로마자는 국립국어원의 ‘국어의 로마자 표기법’에 따라 표기하였으며, 각 음절은 붙임표(-) 부호를 사용하여 구분하였다.

한라감자난초	(Han-ra-gam-ja-nan-cho)
광릉골무꽃	(Gwang-reung-gol-mu-kkot)

- ❹ 영문이름은 가능한 한자어나 일본어의 영향을 받은 용어를 배제하고, 학명, 국명, 식물의 형태, 생태적 특성 및 분포 등을 반영하여 작성함을 기본으로 하였으나, 이미 전 세계적으로 널리 통용되고 있을 경우 미국 농무부 자연 자원보전 서비스의 식물 데이터 베이스 (USDA, United States Department of Agriculture, Natural Resources Conservation Services, Plants Database), 위키백과(Wikipedia), 영국왕립원예 학회의 가드닝 사전 (The New RHS Dictionary of Gardening) 등을 참고하여 반영하였다. 다만, 여러 종에서 영문이름이 혼용되는 경우에는 일부 수정하여 사용하였다.

- ⑤ 지명이 포함된 식물의 영문이름은 지명을 나타내는 단어의 첫 글자를 대문자로 표기하되, 국명에서 사용된 지명을 그대로 반영함을 원칙으로 하였다. 국명에는 지명이 표시되지 않았으나, 분포지역을 근거로 작성한 영문명의 경우, 지명 전체(~도, ~산)를 포함하여 영문이름에 표기하였다.

INTRODUCTION

The pine tree that have shared the fate with Korean people is called a Japanese red pine in English. It means 'Japanese pine tree with red trunk'. Internationally, it is known that the Korean peninsula is the center of pine tree habitat, but the Japanese pine tree was reported to the world before. Now is the time to inform the world that the pine trees are the main tree of Korean peninsula.

Besides Korean plants known as other country's plants, there are plants without any English common names at all. To secure the plants' sovereignty, we have to start make the world understand that our plants 'Korean plants'.

The Korea National Arboretum have classified English names of Korean peninsula to establish the identity of our plants and to inform the world their value.

- The name of plants which their habitat is Korean peninsula, but have other country's name
- The name of plants closely related to our culture and our life
- The name of plants indigenous of Korean peninsula
- The name of plants widespread worldwide but have specific country's name

- ❶ It is targeted on the 4,173 species of vascular plants that inhabit in Korea, and the arrangement of the index is in Korean name order and alphabetic order of the scientific names.
- ❷ The scientific names and Korean names of the taxon are based on the Korean Plants Names Index, and in case of the change of class and giving a synonym to a part of taxon, we used the Tropicos, The Plant List and other documentary records for the complementation and revision.
- ❸ In case of romanization of Korean names, we have inscribed following the 'Romanization of Korean' and we used hyphen between syllables.

한라감자난초	(Han-ra-gam-ja-nan-cho)

- ❹ In case of English names, we have excluded the Chinese and Japanese terms as possible, and we have worked based on the scientific names, Korean Names, morphological and, ecological characteristics and distribution, but if the names were already common around the world, we have referred to the USDA (United States Department of Agriculture, Natural Resources Conservation Services, Plants Database), Wikipedia, The New RHS Dictionary of Gardening. But in case of English names used in several species, we have partly modified the names.

INTRODUCTION

- ⑤ In case of English names with geographical names, we have used the capital letter for the first letter of the geographical name, and we used the Korean geographical name literally same in English. In case of the English names based on the habitat but no geographical names within the Korean name, we have used full geographical names (~do, ~san) in English names.
